Producer: **MONTEX** (Poland)

Montex masks for painting cabins and stencils for distinctive paintings are sold under a common name Plastic Model Club and are divided into three series:

MINI MASK (**SM**) - contain masks for painting cabins;

MAXI MASK (**MM**) - contain masks for painting cabins and stencils for distinctive paintings: national emblems and tactical and functional symbols (bows, crosses, stars, letters, numbers, chevrons etc.)

SUPER MASK (**K**)- contain masks for painting cabins and stencils for distinctive paintings based on photos and other primary sources. Super Mask series also contains colour airplane drawings in four projections depicting the placement of the paintings.

ADDITIONAL INFORMATION:

The masks for cabins are produced of high quality black matt foil, which contrasts with the glazing of the cabin and is easily applied. The glue we use is strong enough not to let the masks deform on oval and curved surfaces. Thanks to special design of the masks the need of using 'Maskol' is reduced to minimum.

The worldwide innovation we introduced is the production of masks for painting the cabins' interior.
