Producent: **Gale Force 9** (USA)

Polecamy!

GFS101 - Barbed Wire (30mm)

Contains 8 metres of 30mm scale barbed wire.

GFS102 - Barbed Wire (15mm)

Contains 6 metres of 15mm scale barbed wire.

These two products provide all the barbed wire you'll need to make your miniatures look sharp! Barbed wire makes for a great addition to battlefield themed bases, or to enhance your table-top defences. Available in two scales to cover 15mm scale wargames such as *Flames Of War*, and 30mm for larger scale Sci-fi and Historical gaming. One metre of barbed wire coiled will give you an 8" length.

GFS103 - Iron Chain (1.5mm)

Contains 2 metres of 1.5mm thick chain.

Whether it's a steam-powered robot, a gun festooned tank, or an imprisoned beast broken free, they all would look great with chains hanging from them.

GFS104 - Snake Chain (1.5mm)

Contains 2 metres of 1.5mm thick snake chain.

Sci-fi gamers will find many uses for this product. Anything from surging power conduits, to hi-tech cables can be achieved with this stylised chain.

GFS106 - Three Strand Rope (0.5mm)

Contains 2 metres of 0.5mm thick rope.

GFS107 - Braided Rope (0.8mm)

Contains 2 metres of 0.8mm thick rope.

The use of ropes dates back to prehistoric times, and is still in use today. No matter what time period your wargaming is taking place, whether it's on sea or land, you're bound to find a use for these lengths of rope.

GFS105 - Iron Cable (1mm)

Contains 2 metres of 1mm thick iron cable.

This month we are releasing a new assortment of hobby rounds to add to the existing GF9 scenics. These first seven codes are the more versatile of the range as they will not only give you great accessories to decorate your bases with, but the uses for rope, cable and chain stretch to both larger models and terrain. We also have barbed wire for both 15mm and 28mm scales. The sets give you plenty of length to work with on your projects. Check out the website for some great ideas on how to use these new Basing Accents.
